Revolutionary Optics and Mindful Glare Control

Indirect Lighting

Wide smooth indirect batwing distribution enables greater row spacing while maintaining ideal ceiling uniformity. Find the flexibility you need, or reduce fixture count without creating harsh contrast.

UGR Values/Table

Baffle Finish	Lumen output	UGR
Black	025U/0100D	2.8
Black	050U/050D	0
White	025U/0100D	10.5
White	050U/050D	5.6

*See specification sheet for optical performance details.

Direct lighting

Soft uniform illumination in a symmetrical 2"x2" aperture with a 45° cutoff angle. Unified Glare Ratings (UGR) of less than 13 and as low as 0 in some configurations.

*See specification sheet for optical performance details.

Make a big statement
with Discreet's compact form.

Installation Versatility

- 2', 4', 6', 8', 12' – simple building blocks to create runs.
- Joining fixtures is quick and provides a rigid and tight connection.
- Navigate existing ceiling obstructions with field adjustable mounting locations.
- The 12' Advantage – Reduce time and labor costs during installation with 33% fewer fixtures, joint connections, and mounting points compared to 8 ft. unit max.
